

Almadraba

Specifications

Crop

Lettuce

Market Segment

Cos - Little Gem

Disease Resistance

High Resistance: BL:1-33

Intermediate Resistance: LMV:1

Features

- Little Gem Cos
- Mid to light green
- Crisp leaf texture
- Medium blister
- Very good uniformity
- Low core

Description:

ALMADRABA is a compact, mid to light green Little Gem Cos of approx. 13-14cm average height, with a low core. ALMADRABA has a crisp, medium-blistered leaf with very good uniformity and weight. It has full resistance to Downy Mildew (BL) and has resistance to Lettuce Mosaic Virus (LMV).

For a full definition of the disease terms, High Resistance and Intermediate Resistance refer to the product section on our website.

The information provided is based on an average of data and observations collected from our trials. Significant variations may occur in the performance due to a range of conditions including cultural/management practices, climate, soil type and geographic location.
