

Barassi

Specifications

Crop

Lettuce

Market Segment

Eazyleaf - Coral Red

Disease Resistance

High Resistance: Bl:1-32, Nr:0

Features

- Glossy, dark red Coral
- High leaf numbers
- Good uniformity
- Full DMR
- Tipburn tolerance

Description:

BARASSI is a glossy, dark red Coral for Eazyleaf production all-year round. It produces a large head with good leaf numbers and very good uniformity. With an attractive incised leaf, a soft leaf texture and pale green to white internal colour, BARASSI gives a nice contrast to mixed lettuce bags. It has shown very good tolerance to tipburn in plantings to date and has resistance to Downy Mildew (Bl) and Currant Lettuce Aphid (Nr).

For a full definition of the disease terms, High Resistance and Intermediate Resistance refer to the product section on our website.

The information provided is based on an average of data and observations collected from our trials. Significant variations may occur in the performance due to a range of conditions including cultural/management practices, climate, soil type and geographic location.
