

Bianca

Specifications

Crop

Capsicum

Market Segment

Low-tech Blocky Coloured

Disease Resistance

High Resistance: Tm:0

Hybrid

Yes

Features

- Speciality coloured greenhouse type
- Attractive ivory white skin colour
- 80mm diameter
- Strong compact plant
- Good leaf cover

Specifications

Description:

A speciality type for protected cropping BIANCA produces high yields of 3-4 lobed fruit, averaging 80mm in diameter. With ivory white to pale lemon skin colour and a green capsicum flavour, BIANCA is ideally suited for niche markets. The strong but compact plant is early to mature with a good protective leaf cover. Highly productive BIANCA has slow colour change when left to ripen on the plant. The fruit weight on average is 190-200gms. A popular and proven variety for speciality coloured capsicum growers.

For a full definition of the disease terms, High Resistance and Intermediate Resistance refer to the product section on our website.

The information provided is based on an average of data and observations collected from our trials. Significant variations may occur in the performance due to a range of conditions including cultural/management practices, climate, soil type and geographic location.
