

E01L.30335

Specifications

Crop

Lettuce

Market Segment

Speciality Head - Oakleaf Green

Disease Resistance

High Resistance: Bl:1-32, Nr:0

Intermediate Resistance: LMV

Features

- Green Oakleaf for year-round production
- Strong bolting tolerance
- Tipburn tolerance
- Excellent uniformity
- Fine lobed leaf

Description:

E01L.30335 is a medium to large-sized green Oak with fine lobed leaves, suitable for year-round production. It has a glossy, mid-green leaf colour and a green internal leaf. In plantings to date it has shown strong tolerance to bolting and tipburn in hydroponic systems, and to fungal rots such as Botrytis in warm, wet conditions. E01L.30335 has excellent uniformity and resistance to Downy Mildew (Bl), Currant Lettuce Aphid (Nr) and Lettuce Mosaic Virus (LMV).

For a full definition of the disease terms, High Resistance and Intermediate Resistance refer to the product section on our website.

The information provided is based on an average of data and observations collected from our trials. Significant variations may occur in the performance due to a range of conditions including cultural/management practices, climate, soil type and geographic location.
