

Eztron

Specifications

Crop

Lettuce

Market Segment

Eazyleaf - Coral Green

Disease Resistance

High Resistance: Bl:1-35, Nr:0

Intermediate Resistance: LMV:1

Features

- Dark green Coral type Eazyleaf
- Fine leaf separation with spiky appearance
- Heavy yields with large leaf volume
- Slow bolting

Description:

EZTRON is a large dark green Eazyleaf Coral type with good volume and yields. The leaves are thick and crisp with a pointed spiky appearance, fine curled margins and dark green tips. EZTRON is a slow bolting variety. It has resistance to Downy Mildew (Bl), Currant Lettuce Aphid (Nr) and Lettuce Mosaic Virus (LMV).

For a full definition of the disease terms, High Resistance and Intermediate Resistance refer to the product section on our website.

The information provided is based on an average of data and observations collected from our trials. Significant variations may occur in the performance due to a range of conditions including cultural/management practices, climate, soil type and geographic location.
