

Harley

SOUTH PACIFIC SEEDS
SINCE 1986

Specifications

Crop
Capsicum

Market Segment
Field Blocky Red

Disease Resistance
Intermediate Resistance: Xcv:1-3

Hybrid
Yes

Features

- Large blocky shape, averaging 10-11x 9cm
- Thick walls with good firmness at red
- Tolerance to crazing and splitting
- More compact plant with good leaf cover

Description:

HARLEY is a large blocky field capsicum for planting in the Warlock segment. The fruit have a large deep blocky shape, with good size and depth maintained in later sets. HARLEY has a more compact plant type whilst maintaining good leaf cover, with less lodging and fruit burn under pressure conditions. Although a little later and slower to colour than Ducati, HARLEY offers tolerance to crazing and shoulder cracks. The fruit are clean and firm at red, and hold well on the plant with less breakdown.

For a full definition of the disease terms, High Resistance and Intermediate Resistance refer to the product section on our website.

The information provided is based on an average of data and observations collected from our trials. Significant variations may occur in the performance due to a range of conditions including cultural/management practices, climate, soil type and geographic location.
