

Quetglas

Specifications

Crop

Lettuce

Market Segment

Iceberg - Lettuce Aphid Nr(0)

Disease Resistance

High Resistance: Bl:16-33, Nr:0

Features

- Large frame and head
- Low core
- Good tipburn tolerance in warmer weather
- Early maturing
- Good uniformity

Description:

QUETGLAS is a summer harvest Iceberg which has shown excellent tolerance to tipburn in plantings to date. It is early to mature with a large frame, large, round head and a short core. QUETGLAS has very good uniformity and colour, and has resistance to Downy Mildew (Bl) and Currant Lettuce Aphid (Nr).

For a full definition of the disease terms, High Resistance and Intermediate Resistance refer to the product section on our website.

The information provided is based on an average of data and observations collected from our trials. Significant variations may occur in the performance due to a range of conditions including cultural/management practices, climate, soil type and geographic location.
