

Rhone

Specifications

Crop

Lettuce

Market Segment

Eazyleaf - Coral Red

Disease Resistance

High Resistance: BL:1-35, Nr:0

Intermediate Resistance: LMV:1

Features

- Dark red Coral Eazyleaf
- Heavy yielding
- Upright and vigorous
- Spikey leaf and fine attachment
- Light green internal colour

Description:

RHONE is a dark red Coral for Eazyleaf production all-year round. It is an upright spikey variety, with a green internal colour and fine attachment for easy harvest. RHONE has a superior, high yielding head with crisp, glossy leaves and excellent uniformity. In plantings to date RHONE has shown very good tolerance to tipburn and has resistance to Downy Mildew (BL), Currant Lettuce Aphid (Nr) and Lettuce Mosaic Virus (LMV).

For a full definition of the disease terms, High Resistance and Intermediate Resistance refer to the product section on our website.

The information provided is based on an average of data and observations collected from our trials. Significant variations may occur in the performance due to a range of conditions including cultural/management practices, climate, soil type and geographic location.
