- Features
- Dark green mini Cos
 - Upright growth habit
 - Slightly blistered leaf
 - Tight, compact heads
 - Cool-cold season harvest

Specifications

Description:

TYRION is a dark green mini Cos with good weight and a u-shaped base. It has an upright growth habit, a crisp, slightly blistered leaf and is suitable for use in cool seasons in an open field or hydroponics. TYRION has tight, compact heads which makes it ideal for packing into twin heart bags, and has shown good resistance to Anthracnose in plantings to date. TYRION also has resistance to Downy Mildew (Bl).

For a full definition of the disease terms, High Resistance and Intermediate Resistance refer to the product section on our website.

The information provided is based on an average of data and observations collected from our trials. Significant variations may occur in the performance due to a range of conditions including cultural/management practices, climate, soil type and geographic location.
