

# Veyron

## Specifications

### Crop

Capsicum

### Market Segment

High-tech Blocky Red

### Disease Resistance

High Resistance: Tm:0-3

### Hybrid

Yes

### Features

- Green to red uniform blocky fruit
- 200 grams average fruit weight
- Mainly 85 mm fruit
- Open and generative plant
- Strong against BER and cracking
- Fast and early maturing with regular production

## Specifications

### Description:

VEYRON is a high yielding easy setting variety with open habit, and medium crop vigour. The fruit are very fast to mature from green to red making it especially early for the first red fruit harvest of the season. It has shown to be strong against age and water spots, cracking and ears. The average summer fruit size is 200gms (Spider size). The plant remains balanced and will not produce large rough flowers or fruit. The plant produces few side shoots and sets high quality fruit mainly on the main stem.

VEYRON is strong against Blossom End Rot because it comes from the Enza Zaden trial program where BER is actively selected against. The fruit are glossy red and very uniform in shape and size. The open plant habit makes it a very labour friendly variety.

*For a full definition of the disease terms, High Resistance and Intermediate Resistance refer to the product section on our website.*

The information provided is based on an average of data and observations collected from our trials. Significant variations may occur in the performance due to a range of conditions including cultural/management practices, climate, soil type and geographic location.
