

Wildebear

Specifications

Crop

Lettuce

Market Segment

Eazyleaf - Coral Green

Disease Resistance

High Resistance: Bl:1-33, Nr:0

Intermediate Resistance: LMV:1

Features

- Green Coral with good uniformity
- Fine leaf attachment
- Heavy heads and very high yield
- Spikey, crisp leaf
- Good tipburn tolerance

Description:

WILDEBEAST is an improved Skilton type, medium to dark green Coral with a crisp, spikey leaf and fine leaf attachment for easy harvest. It has very good uniformity and has shown good tolerance to tipburn in plantings to date. WILDEBEAST is glossy with a pale green to white internal, a good medium to large-sized, heavy head and very high yield. It has tolerance to Downy Mildew (Bl), Currant Lettuce Aphid (Nr) and Lettuce Mosaic Virus (LMV).

For a full definition of the disease terms, High Resistance and Intermediate Resistance refer to the product section on our website.

The information provided is based on an average of data and observations collected from our trials. Significant variations may occur in the performance due to a range of conditions including cultural/management practices, climate, soil type and geographic location.
