Intermediate Resistance: LMV:1

Features

- Dark green mini Cos
- Full DMR
- Glossy, blistered leaf
- Crisp texture
- Very good uniformity
- Tipburn tolerance

Specifications

Description:

XIOMARA is an improved Petite type mini Cos with very good tipburn tolerance and full Downy Mildew (BL) resistance for year-round production. XIOMARA has a dark green, medium-blistered leaf with a crisp texture and is approx. 16cm in length on average for twin packs. XIOMARA offers a low core in warmer months and has shown very good uniformity in the field. It also has resistances to Currant Lettuce Aphid (Nr) and Lettuce Mosaic Virus (LMV).

For a full definition of the disease terms, High Resistance and Intermediate Resistance refer to the product section on our website.

The information provided is based on an average of data and observations collected from our trials. Significant variations may occur in the performance due to a range of conditions including cultural/management practices, climate, soil type and geographic location.
