

Celinet

SOUTH PACIFIC SEEDS
SINCE 1986

Specifications

Crop

Lettuce

Market Segment

Babyleaf - Batavia Green

Disease Resistance

High Resistance: Bl:1-33, Nr:0

Intermediate Resistance: LMV:1

Features

- Upright habit and strong vigour
- Suited to babyleaf production
- Fine leaf attachment
- Medium-thick leaf for good shelf life

Description:

CELINET is an early maturing green babyleaf lettuce with a medium-thick leaf. CELINET has an attractive frill and a very fine leaf attachment giving excellent shape with a small cut surface. It has an upright habit with strong vigour and high yields, and has resistance to Downy Mildew (Bl), Currant Lettuce Aphid (Nr) and Lettuce Mosaic Virus (LMV).

For a full definition of the disease terms, High Resistance and Intermediate Resistance refer to the product section on our website.

The information provided is based on an average of data and observations collected from our trials. Significant variations may occur in the performance due to a range of conditions including cultural/management practices, climate, soil type and geographic location. As a consequence South Pacific Seeds cannot accept any liability as to the accuracy of this information. JUNE 2017. ACN 002 887 256
