

Corinto

Specifications

Crop

Cucumber

Market Segment

Greenhouse Slicer

Disease Resistance

Intermediate Resistance: CMV, CVYV, Px

Hybrid

Yes

Features

- Early maturing with good setting ability
- 20-22cm average fruit length
- Vigorous plant habit
- Suitable for heated and non-heated growing systems

Specifications

Description:

A very flexible greenhouse slicer type, CORINTO will set well during hot conditions with some cold tolerance for growing into the winter. A powerful plant with moderate lateral development, CORINTO sets fruit easily and regularly with high overall yield potential and is more vigorous and earlier to mature than it's sister line Dinero. CORINTO produces high quality fruit which are dark green in colour, have a smooth skin, uniform cylindrical shape and excellent shelf life.

For a full definition of the disease terms, High Resistance and Intermediate Resistance refer to the product section on our website.

The information provided is based on an average of data and observations collected from our trials. Significant variations may occur in the performance due to a range of conditions including cultural/management practices, climate, soil type and geographic location.
