Lettuce

Market Segment

Cos - Mini

Disease Resistance

High Resistance: Bl:1-16,21,23,32

Intermediate Resistance: LMV:1

Features

- Large framed mini Cos
- Slow bolting
- Good tipburn tolerance
- Slightly blistered, dark green leaf

Description:

COSETTE is a large-framed, dark green mini Cos lettuce with a slightly blistered leaf. It is very slow bolting and has good tipburn tolerance. COSETTE was SPS's first popular mini Cos at 16-18cm tall. It has resistance to Downy Mildew (BI) and Lettuce Mosaic Virus (LMV).

For a full definition of the disease terms, High Resistance and Intermediate Resistance refer to the product section on our website.

The information provided is based on an average of data and observations collected from our trials. Significant variations may occur in the performance due to a range of conditions including cultural/management practices, climate, soil type and geographic location.
