

# Kurijiman

**SOUTH PACIFIC SEEDS**  
SINCE 1986

## Specifications

### Crop

Squash

### Market Segment

Kabocha

### Hybrid

Yes

### Disease Resistance

Partial field tolerance to powdery mildew

### Features

- Export squash variety
- 1.7-2.3kg fruit weight
- Wet type (Ebisu)

## Specifications

### Description:

KURIJIMAN is a Kabocha squash variety for export to Japan and Korea. A vigorous vine so able to be sown early in the season, when temperatures are cooler, with good results. An adaptable variety, KURIJIMAN produces heavy yields of fruit with good storage ability. The fruit of KURIJIMAN have a dark green skin and are highly uniform with a 'wetter' texture and nutty flavour.

*For a full definition of the disease terms, High Resistance and Intermediate Resistance refer to the product section on our website.*

The information provided is based on an average of data and observations collected from our trials. Significant variations may occur in the performance due to a range of conditions including cultural/management practices, climate, soil type and geographic location. As a consequence South Pacific Seeds cannot accept any liability as to the accuracy of this information. **SEPTEMBER 2016**. ACN 002 887 256
