

Marinika

SOUTH PACIFIC SEEDS
SINCE 1986

Specifications

Crop

Tomato

Market Segment

Small Cherry <20g

Disease Resistance

High Resistance: Fol:0-1(EU), ToMV,

Ff:1-5,For, Aal, Pst, S

Intermediate Resistance: TYLCV

Hybrid

Yes

Features

- Single pick greenhouse variety
- 18-20 grams AFW
- Excellent firmness and flavour
- Extensive disease package

Description:

MARINIKA is a single harvest cherry to compare to Bliss for non heated greenhouse production. The plant is strong and vigorous and produces multiple trusses, with good setting ability. The fruit are round in shape, of medium to large size (18-20g) with attractive colour, good firmness at mature red stage, and excellent flavour. MARINIKA has shown good tolerance to splitting in plantings to date and has an extensive disease package. A must for all low tech greenhouse cherry growers!

For a full definition of the disease terms, High Resistance and Intermediate Resistance refer to the product section on our website.

The information provided is based on an average of data and observations collected from our trials. Significant variations may occur in the performance due to a range of conditions including cultural/management practices, climate, soil type and geographic location.
