Specifications

Description:

PEDRO is a medium to large sized Poblano type, with an average size of approx. 12-13cm in length, and 6-7cm at the shoulder, tapering to a blunt point. The fruit of PEDRO are mostly 2 lobed in shape, with good firmness, texture and gloss. The fruit have a medium pungency, and turn from a very dark green to dark brown at full maturity.

For a full definition of the disease terms, High Resistance and Intermediate Resistance refer to the product section on our website.

The information provided is based on an average of data and observations collected from our trials. Significant variations may occur in the performance due to a range of conditions including cultural/management practices, climate, soil type and geographic location. As a consequence South Pacific Seeds cannot accept any liability as to the accuracy of this information. JULY 2016. ACN 002 887 256
