

# Raven

**SOUTH PACIFIC SEEDS**  
SINCE 1986

## Specifications

### Crop

Spinach

### Market Segment

Babyleaf and Bunching

### Disease Resistance

High Resistance: Pfs:1-11,15-16

Intermediate Resistance: Pfs:12,14

### Hybrid

Yes

### Features

- Uniform and upright habit
- Thick and smooth spade-shaped leaf
- Attractive dark green colour
- Suited to warm conditions
- Slow maturing

### Description:

RAVEN is a high quality, dark green, spade-shaped spinach with an upright habit which makes it easy to harvest. Slow to mature, RAVEN is smooth with thick leaves. RAVEN is best suited to warm conditions and is 25-30 days to maturity as a babyleaf. It has resistance to Downy Mildew (Pfs).

*For a full definition of the disease terms, High Resistance and Intermediate Resistance refer to the product section on our website.*

The information provided is based on an average of data and observations collected from our trials. Significant variations may occur in the performance due to a range of conditions including cultural/management practices, climate, soil type and geographic location.
