- Extensive disease package

Specifications

Description:

WASEEM is a single fruited variety for cool season production. The plant has high vigour and sets well with a strong, sound vine habit, short internode spacing and many laterals. The fruit are of high quality with an attractive appearance with medium ribbed texture and glossy dark green colour. The fruit are approx. 17-18cm in length with a long stem attachment for ease of harvest. WASEEM offers an excellent disease package including Cucumber Mosaic Virus, Gummosis (Scab), Cucumber Vein Yellowing and Powdery Mildew.

For a full definition of the disease terms, High Resistance and Intermediate Resistance refer to the product section on our website.

The information provided is based on an average of data and observations collected from our trials. Significant variations may occur in the performance due to a range of conditions including cultural/management practices, climate, soil type and geographic location.
