Lettuce

Market Segment

Iceberg

Disease Resistance

High Resistance: Bl:16-27, 29, 32

Hybrid

No

Features

- Early-mid maturing
- Cool season variety
- Dark green
- Uniform, round heads
- Good bolting tolerance

Description

ARIA is a cool season variety for spring harvest with large, dark green, round heads. It is early-mid maturing and has shown very good uniformity and tipburn tolerance in plantings to date. ARIA is sure heading with a medium-large frame, providing nice protection to the head. ARIA has also shown to have good bolting tolerance under variable spring conditions and has resistance to Downy Mildew (Bl).

For a full definition of the disease terms, High Resistance and Intermediate Resistance refer to the product section on our website.

The information provided is based on an average of data and observations collected from our trials. Significant variations may occur in the performance due to a range of conditions including cultural/management practices, climate, soil type and geographic location.
