

Arabica

Crop

Tomato

Market Segment

Coloured Cherry

Hybrid

Yes

Disease Resistance

High Resistance: Pf:1-3

Intermediate Resistance: ToMV:0-2, Ma/Mi/Mj

Features

- Brown hi-tech truss cherry
- Average fruit weight 15g
- Long shelf life
- Sweet and crunchy
- Cold and low light tolerant

Description

ARABICA is a brown truss cherry variety for hi-tech greenhouse production. It has an excellent sweet taste (Brix >9) with a crunchy bite and an average fruit weight of 15g. ARABICA produces 12-14 fruit per truss on a vigorous plant and has good tolerance to cool and low light conditions, with an excellent shelf life of up to 4 weeks under good conditions. ARABICA has resistances to Tomato Mosaic Virus (ToMV), Nematode (Ma,Mi,Mj) and Leaf Mold (Pf) and is suitable to cocopeat or rockwool production.

For a full definition of the disease terms, High Resistance and Intermediate Resistance refer to the product section on our website.

The information provided is based on an average of data and observations collected from our trials. Significant variations may occur in the performance due to a range of conditions including cultural/management practices, climate, soil type and geographic location. As a consequence South Pacific Seeds cannot accept any liability as to the accuracy of this information. DECEMBER 2021. ACN 002 887 256
