

Arrow

Crop

Lettuce

Market Segment

Babyleaf - Coral Green

Hybrid

No

Disease Resistance:

High Resistance: Bl: 16-29,31-33,36

Features

- Upright green Coral for babyleaf
- Fine attachment
- Thick, crispy leaf with good shelf life
- Vigorous with good uniformity
- Good tipburn tolerance

Description

ARROW is a green babyleaf Coral, more suited to warm season production. It has a thick and crispy leaf offering good shelf life, a fine leaf attachment and stands very upright for easy harvest. It has shown strong vigour, good uniformity and tipburn tolerance in plantings to date. ARROW has resistance to Downy Mildew (Bl).

For a full definition of the disease terms, High Resistance and Intermediate Resistance refer to the product section on our website.

The information provided is based on an average of data and observations collected from our trials. Significant variations may occur in the performance due to a range of conditions including cultural/management practices, climate, soil type and geographic location.
