

# Aurora

**SOUTH PACIFIC SEEDS**  
SINCE 1986

## Crop

Broccoli

## Market Segment

Fresh Market

## Hybrid

Yes

## Features

- Early maturing variety
- Good dome shape
- Fine bead with very green colour
- Excellent head weight
- Autumn to early winter harvest

## Description

AURORA is an improved Atomic type with early maturity (approx. 60 days from transplant) and is suited for autumn to early winter harvest. AURORA has a dome-shaped head and strong tolerance to Hollow Stem with excellent head weight, fine bead size and dark green colour.

Cultural Notes: AURORA has no anthocyanin gene which otherwise makes broccoli go purple in cold weather, so it keeps a nice green colour. However this can make the colour a bit paler in hot conditions. AURORA will go blind under certain conditions, particularly early spring transplant.

The information provided is based on an average of data and observations collected from our trials. Significant variations may occur in the performance due to a range of conditions including cultural/management practices, climate, soil type and geographic location. As a consequence South Pacific Seeds cannot accept any liability as to the accuracy of this information. JANUARY 2024. ACN 002 887 256
