

Aurora

SOUTH PACIFIC SEEDS
SINCE 1986

Crop

Broccoli

Market Segment

Fresh Market

Hybrid

Yes

Features

- Early maturing variety
- Good dome shape
- Fine bead with very green colour
- Excellent head weight
- Autumn to early winter harvest

Description

AURORA is an improved Atomic type with early maturity (approx. 60 days from transplant) and is suited for autumn to early winter harvest. AURORA has a dome-shaped head and strong tolerance to hollow stem with excellent head weight, fine bead size and dark green colour. AURORA has shown less susceptibility to White Rust (Ac) in plantings to date.

Cultural Notes: AURORA has no anthocyanin gene which otherwise makes broccoli go purple in cold weather, so it keeps a nice green colour. However this can make the colour a bit paler in hot conditions. AURORA will go blind under certain conditions, particularly early spring transplant

For a full definition of the disease terms, High Resistance and Intermediate Resistance refer to the product section on our website.

The information provided is based on an average of data and observations collected from our trials. Significant variations may occur in the performance due to a range of conditions including cultural/management practices, climate, soil type and geographic location. As a consequence South Pacific Seeds cannot accept any liability as to the accuracy of this information. **SEPTEMBER 2020.** ACN 002 887 256
