

# Avano

## Crop

Carrot

## Market Segment

Nantes

## Hybrid

Yes

## Disease Resistance

Intermediate Resistance: Ad, Eh

## Features

- High yielding and very uniform variety
- Slow bolting for spring harvest
- Good colour and length

## Description

AVANO is a slow-bolting carrot with good colour and uniformity. This high yielding variety has a smooth texture with good length and a cylindrical shape. AVANO has intermediate resistance to Alternaria Leaf Blight (Ad) and Powdery Mildew (Eh) and shows good results for spring harvest, in districts where regrowth is a problem.

For a full definition of the disease terms, High Resistance and Intermediate Resistance refer to the product section on our website.

The information provided is based on an average of data and observations collected from our trials. Significant variations may occur in the performance due to a range of conditions including cultural/management practices, climate, soil type and geographic location.
