

Barrier 2

Crop

Watermelon

Market Segment

Rootstock

Disease Resistance

Intermediate Resistance: Fon:1,2

Features

- True watermelon rootstock
- Very efficient to grow
- No bitter after taste

Description

BARRIER 2 is a true watermelon rootstock used for grafting onto seedless watermelon for improved Fusarium intermediate resistance. BARRIER 2 is more efficient to grow than other rootstock types. BARRIER 2 does not impart a bitter aftertaste to the watermelon fruit. BARRIER 2 contributes to better flesh firmness and density.

For a full definition of the disease terms, High Resistance and Intermediate Resistance refer to the product section on our website.

The information provided is based on an average of data and observations collected from our trials. Significant variations may occur in the performance due to a range of conditions including cultural/management practices, climate, soil type and geographic location.
