No

Disease Resistance
High Resistance: Bl:16-21,23-36

- Features**
- Tall, upright babyleaf Cos with dark green leaf
 - High yielding for year-round production
 - Vigorous and uniform cupped leaf

Description
CAESAREA is a dark green Cos variety for year-round babyleaf production. The glossy leaf is slightly cupped and savoyed, with good thickness and a fine attachment. CAESAREA has an upright and tall growth habit with good uniformity and vigour, and has shown very good tolerance to tipburn in plantings to date. CAESAREA is high yielding and has resistance to Downy Mildew (Bl).

For a full definition of the disease terms, High Resistance and Intermediate Resistance refer to the product section on our website.

The information provided is based on an average of data and observations collected from our trials. Significant variations may occur in the performance due to a range of conditions including cultural/management practices, climate, soil type and geographic location.
