

Cherry Bite

SOUTH PACIFIC SEEDS
SINCE 1986

Crop

Tomato

Market Segment

Large Cherry >20g

Hybrid

Yes

Disease Resistance

Intermediate Resistance: Va, Fol:0,1(EU), TMV, TSWV:5, TYLCV

Features

- Indeterminate cocktail cherry
- Very firm glossy fruit
- High yield potential
- Excellent disease package

Description

CHERRY BITE is a vigorous indeterminate cherry type with uniform medium-large sized globe shaped fruit, 15-20g in size. It has very firm fruit with a glossy clean appearance, good sweet flavour and high yield potential. CHERRY BITE has an extensive disease package which includes intermediate resistance to TSWV and TYLCV, and is highly recommended for when a larger fruit size is required.

For a full definition of the disease terms, High Resistance and Intermediate Resistance refer to the product section on our website.

The information provided is based on an average of data and observations collected from our trials. Significant variations may occur in the performance due to a range of conditions including cultural/management practices, climate, soil type and geographic location.
