

Cicero

SOUTH PACIFIC SEEDS
SINCE 1986

Crop

Tomato

Market Segment

Roma

Hybrid

Yes

Disease Resistance

Intermediate Resistance: Va, Fol:1-3(US), ToMV, TSWV, TYLCV, Pf:5, N

Features

- Saladette roma for greenhouse cropping
- Large fruit size
- Excellent colour and quality
- Consistent setting throughout the plant
- Extensive disease package

Description

CICERO is an indeterminate Saladette roma type for greenhouse production. CICERO is mid-maturing and has a vigorous plant and an extensive disease package, including Fusarium Wilt races 1-3, TSWV, TYLCV, Cladosporium and Nematodes. With the ability to set approx. 5-7 fruit per cluster throughout the plant, CICERO produces high yields of large firm fruit with an average fruit size of 130-160g. The fruit have shown very good quality with uniform green shoulder, and excellent colour at red.

Cultural Notes: Not recommended for outdoor production.

For a full definition of the disease terms, High Resistance and Intermediate Resistance refer to the product section on our website.

The information provided is based on an average of data and observations collected from our trials. Significant variations may occur in the performance due to a range of conditions including cultural/management practices, climate, soil type and geographic location. As a consequence South Pacific Seeds cannot accept any liability as to the accuracy of this information. DECEMBER 2021. ACN 002 887 256
