

Cobra

Crop

Tomato

Market Segment

Greenhouse Cherry <25g

Hybrid

Yes

Disease Resistance

High Resistance: Fol:0-1(EU), ToMV, Vd:0, Va:0

Intermediate Resistance: N:Ma/Mi/Mj

Features

- Brown-red oval-shaped cherry
- Dark green stripes
- Approx. ten fruit per truss
- Good uniformity and fruit firmness

Description

COBRA is a speciality oval-shaped brown-red cherry variety with dark green stripes and uniform fruit, of an average 17g each. Avoid picking at the full red over-ripe stage. The plant has proven to be vigorous and productive, with each truss producing approx. 10 firm fruit. COBRA has shown good set and size in commercial plantings to date and has a good disease package which includes resistances to Fusarium Wilt (Fol), Tomato Mosaic Virus (ToMV), Nematodes (Ma/Mi/Mj) and Verticillium Wilt (Va/Vd).

For a full definition of the disease terms, High Resistance and Intermediate Resistance refer to the product section on our website.

The information provided is based on an average of data and observations collected from our trials. Significant variations may occur in the performance due to a range of conditions including cultural/management practices, climate, soil type and geographic location.
