

Colorado

Crop

Cucumber

Market Segment

Greenhouse Lebanese

Hybrid

Yes

Disease Resistance

High Resistance: Ccu

Intermediate Resistance: CMV, CVYV, Px

Features

- Multi fruited warm season type
- 15-17cm average fruit length
- Dark green skin
- Strong but compact open habit
- Proven performance over many years

Description

This high yielding multi-fruited Lebanese cucumber has become a long-standing market standard for the spring, summer and early autumn production period. COLORADO has a strong but compact plant with open habit. The fruit are dark green and approx. 15-17cm in length. COLORADO is high yielding and has an excellent disease package including intermediate resistance to Powdery Mildew (Px).

For a full definition of the disease terms, High Resistance and Intermediate Resistance refer to the product section on our website.

The information provided is based on an average of data and observations collected from our trials. Significant variations may occur in the performance due to a range of conditions including cultural/management practices, climate, soil type and geographic location.
