

Columbia

SOUTH PACIFIC SEEDS
SINCE 1986

Crop

Zucchini

Market Segment

Lebanese

Hybrid

Yes

Disease Resistance

Intermediate Resistance: WMV, ZYMV

Features

- Upright open plant
- Exceptional fruit quality
- Nice glossy clean skin

Description

A multi virus tolerant Lebanese zucchini from SPS, COLUMBIA is highly recommended for any areas growing Lebanese fruit types. With an upright open plant habit and a similar fruit type to Clarita, COLUMBIA produces fruit of exceptional quality with a nice glossy clean skin. COLUMBIA has become a major variety in the Sydney basin and is well suited to both open field and covered cropping.

Cultural Notes: *It is recommended that standard spray programs be maintained to help lessen the effects of disease carrying insects, and to further enhance virus tolerance.*

For a full definition of the disease terms, High Resistance and Intermediate Resistance refer to the product section on our website.

The information provided is based on an average of data and observations collected from our trials. Significant variations may occur in the performance due to a range of conditions including cultural/management practices, climate, soil type and geographic location. As a consequence South Pacific Seeds cannot accept any liability as to the accuracy of this information. **SEPTEMBER 2020.** ACN 002 887 256
