

Desert

SOUTH PACIFIC SEEDS
SINCE 1986

Crop

Zucchini

Market Segment

Dark Green

Hybrid

Yes

Disease Resistance

Intermediate Resistance: CMV, PRSV, WMV, ZYMV, Px

Features

- Dark green glossy fruit
- Cylindrical shape
- Strong but open plant habit
- Extensive disease package

Description

DESERT is a very dark green zucchini with a more cylindrical shape than Enzo and Nitro, with an excellent gloss and tidy flower scar. Yields have been very high in plantings to date, comparable to Enzo. DESERT is best suited to warmer season harvest periods and offers virus resistance levels which exceed most current commercial varieties.

For a full definition of the disease terms, High Resistance and Intermediate Resistance refer to the product section on our website.

The information provided is based on an average of data and observations collected from our trials. Significant variations may occur in the performance due to a range of conditions including cultural/management practices, climate, soil type and geographic location. As a consequence South Pacific Seeds cannot accept any liability as to the accuracy of this information. SEPTEMBER 2020. ACN 002 887 256
