

Dom

Crop

Cucumber

Market Segment

Greenhouse Continental

Hybrid

Yes

Disease Resistance

High Resistance: Cca, Ccu

Intermediate Resistance: Px

Features

- Versatile performer
- Open easily worked plant habit
- Dark green colour
- 33-35cm av. fruit length (depending on season)
- Excellent uniformity
- Very good shelf life

Description

DOM is a versatile continental type for heated and non-heated production under mild conditions, extending further into warmer conditions in some regions. Easy and consistent setting is a feature of this vigorous variety. DOM produces attractive dark green fruit 33-35cm [depending on season] with very good shelf life. The fruit have a straight shape with very good uniformity throughout the growing cycle. Offering intermediate tolerance to Powdery Mildew, DOM is a reliable variety that offers excellent adaptability.

For a full definition of the disease terms, High Resistance and Intermediate Resistance refer to the product section on our website.

The information provided is based on an average of data and observations collected from our trials. Significant variations may occur in the performance due to a range of conditions including cultural/management practices, climate, soil type and geographic location.
