

Estilo

Crop

Melon

Market Segment

Green Flesh Small

Hybrid

Yes

Disease Resistance

High Resistance: Fom:2

Intermediate Resistance: Px:1

Features

- Larger Sweet Delight type
- Excellent internal quality
- Crisp sweet flesh

Description

If you have a requirement for a slightly larger fruit size than Sweet Delight then ESTILO might be for you. It is a green fleshed honeydew with a clean bright white skin colour. The internal quality is very good with a nice small, tight cavity and good flavour. Crisp flesh is also an added bonus with ESTILO. The plant is very vigorous and has resistance to Fusarium Wilt (Fom) and Powdery Mildew (Px).

For a full definition of the disease terms, High Resistance and Intermediate Resistance refer to the product section on our website.

The information provided is based on an average of data and observations collected from our trials. Significant variations may occur in the performance due to a range of conditions including cultural/management practices, climate, soil type and geographic location. As a consequence South Pacific Seeds cannot accept any liability as to the accuracy of this information. SEPTEMBER 2020. ACN 002 887 256
