

Florence

Crop

Lettuce

Market Segment

Cos - Little Gem

Hybrid

No

Disease Resistance

High Resistance: Bl:16-29,32-34

Features

- Light green Gem variety
- Excellent bolting & tipburn tolerance
- Excellent uniformity
- Crisp external leaves with medium blister
- Short cores

Description

FLORENCE is a light green Gem variety for year-round production, with excellent uniformity and a medium blistered leaf. FLORENCE has shown excellent tipburn and bolting tolerance in plantings to date with a short core and good head weight/density. It has a light green-yellow internal whilst the outer leaf offers good gloss and crispness. FLORENCE is approx. 14cm in height and is an ideal variety for multi-packs with minimal trim required. It has resistance to Downy Mildew (Bl).

For a full definition of the disease terms, High Resistance and Intermediate Resistance refer to the product section on our website.

The information provided is based on an average of data and observations collected from our trials. Significant variations may occur in the performance due to a range of conditions including cultural/management practices, climate, soil type and geographic location.
