

Gatsby

Crop

Spinach

Market Segment

Babyleaf

Hybrid

Yes

Disease Resistance

High Resistance: Pe:1-12, 14-16

Features

- Warm season variety
- Thick, dark green leaf
- Semi-savoy with a glossy sheen
- High yielding

Description

GATSBY is a true warm season variety with a thick, semi-savoy, slightly pointed, oval-shaped and lightly cupped leaf. GATSBY has an attractive dark green colour with a standout gloss and is high yielding. The leaf attributes of GATSBY give very good shelf life and volume to babyleaf bags. GATSBY has a semi-erect habit, which may become more erect when densely sown. GATSBY has shown very good uniformity to date and has resistance to Downy Mildew (Pe).

For a full definition of the disease terms, High Resistance and Intermediate Resistance refer to the product section on our website.

The information provided is based on an average of data and observations collected from our trials. Significant variations may occur in the performance due to a range of conditions including cultural/management practices, climate, soil type and geographic location.
