

Hawk

SOUTH PACIFIC SEEDS
SINCE 1986

Crop

Capsicum

Market Segment

Low-tech Blocky Red

Hybrid

Yes

Disease Resistance

Intermediate Resistance: Tm:0-3

Features

- Long blocky red, vigorous and strong
- Late summer planting for cool season harvest
- Good cover, size and vigour

Description

HAWK is a long blocky red variety for late summer planting into cool season harvest. The plant is strong and vigorous with good cover, producing four-lobed fruit of a good size and colour. HAWK average fruit weight is 320g and approximately 12x10cm in size with a nice shape and good uniformity. HAWK sets well in soil substrate and is confirmed L4 resistance (Tm 0-3) which includes resistances to Tomato Spotted Wilt virus (TSWV), Tomato Mosaic virus (ToMV), Pepper Mild Mottle virus (PMMoV), Paprika Mild Mottle virus (PaMMV) and Tobacco Mosaic virus (TMV).

For a full definition of the disease terms, High Resistance and Intermediate Resistance refer to the product section on our website.

The information provided is based on an average of data and observations collected from our trials. Significant variations may occur in the performance due to a range of conditions including cultural/management practices, climate, soil type and geographic location. As a consequence South Pacific Seeds cannot accept any liability as to the accuracy of this information. JANUARY 2022. ACN 002 887 256
