

Jinx

SOUTH PACIFIC SEEDS
SINCE 1986

Crop

Spinach

Market Segment

Babyleaf

Hybrid

Yes

Disease Resistance

High Resistance: Pe:1-10,15

Features

- Dark green, lightly savoyed leaf
- Oval, slightly cupped leaf shape
- High yielding with upright growth habit

Description

JINX is a high yielding, dark green spinach suitable for cool season babyleaf production. The leaf is slightly cupped and savoyed with an oval shape, and an upright growth habit making it easy to harvest. The upright habit also allows air movement through the crop, reducing disease growth and encouraging healthy plant growth. JINX performs well during periods of high rainfall, maintaining its dark green colour, and has some resistance to Downy Mildew (Pe).

For a full definition of the disease terms, High Resistance and Intermediate Resistance refer to the product section on our website.

The information provided is based on an average of data and observations collected from our trials. Significant variations may occur in the performance due to a range of conditions including cultural/management practices, climate, soil type and geographic location. As a consequence South Pacific Seeds cannot accept any liability as to the accuracy of this information. SEPTEMBER 2020. ACN 002 887 256
