SOUTH PACIFIC SEEDS
SINCE 1986

Crop

Cucumber

Market Segment

Greenhouse Continental

Hybrid

Yes

Disease Resistance

High Resistance: Ccu, CMV, CVYV, Px, CGMMV

Features

- Generative variety for shoulder season production
- Highly productive with open plant habit
- Excellent disease package
- Lightly ribbed, mid-dark green fruit
- Avg. 30-32cm length

Description

KATHRYN is a highly productive Continental type for shoulder season or heated greenhouse production. This strong but generative variety has an open plant habit with attractive dark green leaf and a strong disease package. The fruit are lightly ribbed with a mid to dark green colour and average 30-32cm length. Resistances include Scab & Gummosis (Ccu), Cucumber Mosaic virus (CMV), Cucumber Green Mottle Mosaic virus (CGMMV), Cucumber Vein Yellowing (CVYV) and Powdery Mildew (Px).

For a full definition of the disease terms, High Resistance and Intermediate Resistance refer to the product section on our website.

The information provided is based on an average of data and observations collected from our trials. Significant variations may occur in the performance due to a range of conditions including cultural/management practices, climate, soil type and geographic location. As a consequence South Pacific Seeds cannot accept any liability as to the accuracy of this information. NOVEMBER 2021. ACN 002 887 256
