Disease Resistance

High Resistance: Bl:16-24,27,28,30-32

Features

- Medium-sized round head and frame
- Short core
- Early to mid maturing
- Smooth leaf
- Bolting and tipburn tolerance

Description

KING is an early to mid-maturing variety with a medium-sized, round head and frame. It has a smooth leaf of mid green colour and also presents with a short core. KING suits autumn harvest in Vic and winter harvest in Qld for growers wanting a medium sized head. KING has shown good uniformity with tipburn and bolting tolerance in plantings to date and has some Downy Mildew (Bl) resistance.

For a full definition of the disease terms, High Resistance and Intermediate Resistance refer to the product section on our website.

The information provided is based on an average of data and observations collected from our trials. Significant variations may occur in the performance due to a range of conditions including cultural/management practices, climate, soil type and geographic location.
