

Kurijiman

SOUTH PACIFIC SEEDS
SINCE 1986

Crop

Squash

Market Segment

Kabocha

Hybrid

Yes

Features

- Export squash variety
- 1.7-2.3kg fruit weight
- Wet type (Ebisu)
- Good vigour for early season production

Description

KURIJIMAN is a Kabocha squash variety for export to Japan and Korea. The vigorous vine enables the variety to be sown early in the season, when temperatures are cooler, with good results. An adaptable variety, KURIJIMAN produces heavy yields of fruit with good storage ability. The fruit of KURIJIMAN have a dark green skin and are highly uniform with a "wetter" texture and nutty flavour.

Cultural Notes: *Partial field tolerance to Powdery Mildew.*

For a full definition of the disease terms, High Resistance and Intermediate Resistance refer to the product section on our website.

The information provided is based on an average of data and observations collected from our trials. Significant variations may occur in the performance due to a range of conditions including cultural/management practices, climate, soil type and geographic location. As a consequence South Pacific Seeds cannot accept any liability as to the accuracy of this information. **SEPTEMBER 2020.** ACN 002 887 256
