

Lancelot

Crop

Basil

Crop type

Herb

Hybrid

No

Features

- Dark green domed leaf
- Strong tipburn tolerance
- Compact and uniform

Description

LANCELOT is a dark green basil with compact growth, suitable for year-round cultivation in protected cropping pots. It is also an excellent choice for bunched plants without sagging or losing shape. LANCELOT is a very uniform variety with slightly dome-shaped leaves but without the larger leaf droop of some Genovese type basil. It is strong against tipburn and holds up well to leaf damage at the packaging stage.

The information provided is based on an average of data and observations collected from our trials. Significant variations may occur in the performance due to a range of conditions including cultural/management practices, climate, soil type and geographic location.
