

Layal

Crop

Cucumber

Market Segment

Greenhouse Lebanese

Hybrid

Yes

Disease Resistance

Intermediate Resistance: Px

Features

- Single fruited cool season type
- Uniform dark green fruit; 16-17cm
- Long shelf life
- Compact plant structure
- Early to harvest
- High yield potential

Description

LAYAL is a single fruited type for cool season production. LAYAL has a strong but compact plant habit with very few laterals. The strength and vigour of the plant contribute to its high yield ability and good fruit quality at the top of the plant. The fruit are medium length; 16-17cm with dark green colour and moderate rib. LAYAL has excellent uniformity and yield with long shelf life and is recommended for winter production in SA and Qld regions.

Cultural Notes: LAYAL starts as a single fruited variety in the winter months but tends to go more semi-multi as the weather warms up.

For a full definition of the disease terms, High Resistance and Intermediate Resistance refer to the product section on our website.

The information provided is based on an average of data and observations collected from our trials. Significant variations may occur in the performance due to a range of conditions including cultural/management practices, climate, soil type and geographic location.
