

Lemonstar

Crop

Tomato

Market Segment

Grape - Coloured

Hybrid

Yes

Disease Resistance

High Resistance: Fol:1, ToMV:0-2

Intermediate Resistance: Sbl, S, Sl

Features

- Vibrant lemon-yellow speciality grape
- Avg. 15 firm fruit per truss
- Very good uniformity of size and colour
- Vigorous and good setting ability
- Graft to a very strong and vigorous rootstock

Description

LEMONSTAR is a vibrant lemon-yellow speciality grape for greenhouse production. The vine is compact with very good setting ability, strength and vigour. LEMONSTAR AFW is 15g with an average of 15 firm fruit per truss. The fruit is beautifully uniform in colour and size, has excellent tolerance to splitting/cracking and should be grafted to a very strong and vigorous rootstock. It has resistances to Fusarium Wilt (Fol), Tomato Mosaic Virus (ToMV) and Gray Leaf Spot (Sbl, Sl, Ss).

For a full definition of the disease terms, High Resistance and Intermediate Resistance refer to the product section on our website.

The information provided is based on an average of data and observations collected from our trials. Significant variations may occur in the performance due to a range of conditions including cultural/management practices, climate, soil type and geographic location.
