

Logan

Crop

Capsicum

Market Segment

Blocky Red

Hybrid

Yes

Disease Resistance

Intermediate Resistance: Xspp: 1-4,7-9

Features

- Firm fruits with excellent green and red colouring
- Large blocky size
- Good leaf cover

Description

LOGAN is a large blocky capsicum with excellent uniformity producing fruit with exceptional firmness at the red stage. LOGAN generally has a compact plant habit with good leaf cover. An added feature of LOGAN is its versatility for harvest of top quality fruit at either the green or red stage.

Cultural Notes: Logan has shown some resistance to heat stress in trials.

For a full definition of the disease terms, High Resistance and Intermediate Resistance refer to the product section on our website.

The information provided is based on an average of data and observations collected from our trials. Significant variations may occur in the performance due to a range of conditions including cultural/management practices, climate, soil type and geographic location. As a consequence South Pacific Seeds cannot accept any liability as to the accuracy of this information. AUGUST 2023. ACN 002 887 256
