

Napoleon

Crop

Basil

Market Segment

Marian/Prospera

Hybrid

No

Disease Resistance

Intermediate Resistance: Pb

Features

- Genovese type
- Compact plant
- Dark green leaf

Description

NAPOLEON is a Genovese type basil with a compact plant, dark glossy green leaf of a medium-large size and excellent uniformity. It is recommended for year round production, suited for bunching, sleeve and potted use.

For a full definition of the disease terms, High Resistance and Intermediate Resistance refer to the product section on our website.

The information provided is based on an average of data and observations collected from our trials. Significant variations may occur in the performance due to a range of conditions including cultural/management practices, climate, soil type and geographic location. As a consequence South Pacific Seeds cannot accept any liability as to the accuracy of this information. FEBRUARY 2025. ACN 002 887 256
