

Nadia

Crop

Cucumber

Market Segment

Greenhouse Continental

Hybrid

Yes

Disease Resistance

Intermediate Resistance: CGMMV

Features

- Vigorous plant for spring, early summer and autumn production
- For soil or substrate
- CGMMV resistance

Description

NADIA is a continental cucumber variety recommended for spring, early summer and autumn production, with resistance to CGMMV. NADIA is a vigorous variety which produces mid-dark green fruit with a medium-ribbed skin texture. In plantings to date, NADIA has produced fruit of approx. 30cm long and has shown some tolerance to Powdery Mildew (Px). NADIA is suitable to be grown in soil or substrate.

For a full definition of the disease terms, High Resistance and Intermediate Resistance refer to the product section on our website.

The information provided is based on an average of data and observations collected from our trials. Significant variations may occur in the performance due to a range of conditions including cultural/management practices, climate, soil type and geographic location.
