

Nara

Crop

Cucumber

Market Segment

Greenhouse Lebanese

Hybrid

Yes

Disease Resistance

High Resistance: Ccu

Intermediate Resistance: CMV, CVYV, Px

Features

- High quality single fruited type
- Good colour and texture
- Strong well balanced plant
- Consistent setting with high yield potential
- Suit cool season production

Description

NARA is a single fruited greenhouse Lebanese cucumber for cool season production. The strong plant is well balanced and has an attractive dark leaf with good power and vigour. NARA has a high yield potential, with excellent and consistent setting right up the plant, with uniform fruit development. The fruit have excellent quality and colour, with a lightly ribbed texture and mid green appearance. The average fruit length of NARA is around 17-18cm in length. NARA is suggested for autumn, winter and early spring production. It has resistances to Scab & Gummosis (Ccu), Cucumber Mosaic Virus (CMV), Cucumber Vein Yellowing (CVYV) and Powdery Mildew (Px).

For a full definition of the disease terms, High Resistance and Intermediate Resistance refer to the product section on our website.

The information provided is based on an average of data and observations collected from our trials. Significant variations may occur in the performance due to a range of conditions including cultural/management practices, climate, soil type and geographic location.
